England's Latest Blunder. The "last great monopoly" refuses to ie decently. The way the British au-norities deal with the Hudson's Bay ompany is a striking evidence of the illiculty men find in understanding illiculty men find in understanding hearly the conditions of societies and cerritories unlike those to which they eave been accustomed. In England, where all the land is held so high that it is as improbable that a laboring man can ver become the owner of a farm as that he should buy a prime lot on Broanlway, he linke of Buckingham, who appears to have conducted the negotiations with he "Umpany," has found it impossible to conceive the best method of settling in entirely new country, where the land

It seems that the amount of land thus to be reserved is not less than five thousand acres in each case, and the company has about a fundred such stations. They are now the trading posts of the terrifory, and are naturally the sites far its future towns and cities. Thus the centers of trade and popularium are to remain as monopolies in the ion are to remain as monopo reacted by the free nonesteads of our side of the line. Thus the British territory is likely to remain unsettled, and the company may continue to enjoy practically its present monopoly of trade and furs, while the cost of civil government with fall.

and furs, while the cost of civil government would fall upon the Dominion.

Whatever may have been the blunders of British statesmen, the people of the British islands are pre-eminent among the nations of the Old World for practical success as colonists. By the aid of steam the territory of their Northwestern possessions might be reached in a fortnight from the British shores, if due facilities of travel are developed. The superabundant population of the islands. find congenial homes in the British North American possessions, and become homogeneous there. The territory might be rapidly settled and a vast addition made to the happiness of man and his peaceful victories over the wilderness. It seems as if the blumlers of bowning street would long defer this desirable consummation.

He says "there is not a Christian beneath the scope of God's heaven from whom I am separated. At the Lord's table, I always invite all Christians to come and sit down, and commune with us. If any man were to tell me that I am separate from the Episcopalian, the Presbyterian or the Methodist, I should tell him he did not know me, for I love them with a purpheart fervently, and I am not separate from them."

Mr. M., being in bed at the time, dressed himself, and expressed himself ready to comply with their wishes.
